

OakLabs is one of the world's leading companies for biomarker development in the context of precision medicine. Our interdisciplinary team of quantum physicists and life scientists brings artificial intelligence to drug development and disrupts the traditional R&D process.

Use your excellence to shape the future of an AI company in the medical sphere.

Chief Business Officer (m/f/d)

Location: Hennigsdorf (30min from Berlin city centre), Germany

Employment: full time

Duration: unlimited

What You Should Know About OakLabs

Since its foundation in 2011, OakLabs has delivered highly efficient R&D solutions to customers worldwide. With our unique IP in artificial intelligence and machine learning we initiated the next generation of biomarkers in order to predict the efficacy of a medication for an individual patient. We are now in the process of expanding the value chain, enabling significant growth. To master this challenge we strive at complementing our management team of the two scientific founders with a chief business officer.

Your Role

As part of the management team you are responsible for identifying and pursuing business opportunities as well as for structuring and negotiating deals for joint development projects with pharma and biotech companies in Europe, the USA and China. You translate market insights into business strategies and coordinate teams and processes cross-functionally.

Your Skills and Personal Requirements

- University degree, ideally PhD holder
- In-depth understanding of the pharmaceutical branch
- 5+ years of experience in strategy consulting
- Entrepreneurial mindset and ability to always think out of the box
- Excellent communication skills in English, German desired
- Excellent interpersonal, communication and negotiation skills
- Team player with leadership skills and a positive attitude
- Flexibility to travel internationally and frequently

Our Offer

We offer the rare opportunity to apply your excellence and experience to shape the future of a company with disruptive technology in a field of great importance. In addition, you will be able to benefit directly from the company's success.

How to apply

Please get in touch with Dr. Martina Schad (CEO) via email to career@oak-labs.com. We will get back to you as soon as possible!
